# Specialist<sup>™</sup> 300

The Solution for Short Run Web Finishing.

## Produce integral labels and integral cards quickly and accurately with the Specialist<sup>™</sup> 300.

The Specialist<sup>™</sup> converts a roll of tape or laminate to a label or card by cutting the material and placing it onto a continuous form at speeds up to 300 FPM (90 m/min.) The form is then die-cut in the area of the patch to produce the label or card.

### Integral Cards

Memberships  
Associations  
Phone Cards  
Loyalty Programs  
Insurance Cards  
Hospital ID Bands  
Badges  
Permits

### Integral Labels

Picking/Packing Slips  
Invoices  
Return Authorizations  
Inventory Forms  
Hospital Forms  
Pharmacy Forms  
Financial Forms  
Windshield Stickers  
Direct Mail

- ◆ Operator-friendly features provide **quick set-up**.
- ◆ Smaller cylinder circumferences and bearer-loaded design offer **fast size changeovers**.
- ◆ **Reduced die costs** due to smaller magnetic cylinder circumferences.
- ◆ Unique vacuum hole spacing on application cylinder assures **accurate patch placement**.
- ◆ **Rigid die cut unit** cuts through thick laminates and thin tapes.
- ◆ **Rugged, industrial design** engineered to provide reliable, multi-shift operation.

# Improve Productivity and Reduce Waste With The *Specialist*™ 300

Vacuum cylinder holes, spaced every 1/2" across and around the cylinder provide positive patch placement.

Rugged steel framework and tight cylinder tolerances assure accurate, consistent die-cutting of thin tapes and thick laminates.

Keypad entry of patch length provides quick set-up and precise cut length to the nearest .001".

## Experience you can depend on.

Responsive customer service, thorough training programs, and label/card experience provide you with the knowledge needed to succeed in the integral market.

## Specifications

**Web Speed** 300 FPM  
(90 m/min)

**Web Width** 13"  
(330 mm)

**Patch Length** From 1" to 11"  
(25 - 279 mm)

**Patch Width** From 2" to 12.75"  
(50 - 323 mm)

### Variable Cylinder Circumferences

**Cutoff** 8.5" - 17"  
(216 - 425 mm)

**Magnetic** 8.5" - 17"  
(216 - 425 mm)
